# ABS Wavesight™
# NAUTICAL SYSTEMS DRYDOCK MANAGER™

## Maritime Fleet Management Software

The ABS Wavesight Nautical Systems® Drydock Manager™ consolidates the planning, bidding and execution processes to deliver a well-planned drydocking for on-time and on-budget delivery.

## Powerful. Simple. **Reliable.**

## EXECUTE WELL-PLANNED DRYDOCKING
### LIFE CYCLE DRYDOCK MANAGEMENT

Leveraging existing equipment information, hull condition and maintenance history, ABS Wavesight NS Drydock Manager prepares the drydock specification, facilitates competitive bidding, monitors execution in the yard and supports negotiation of the final drydock invoice. Completion of drydock automatically updates the maintenance plan.

## NS DRYDOCK MANAGER™ CAPABILITIES

### BID MANAGEMENT

- The drydock specification is automatically generated for each shipyard as an entire package, allowing users to easily send competitive bids to multiple yards

- Consolidated and detailed bid and drydock history strengthens negotiating position during final drydock cost validation and settlement

### PROJECT CONTROL

- Users have easy access to all of the drydockings for an entire fleet, both current and historical

- Unified access and visibility to all information required to manage drydock execution and budget

### NS SOFTWARE INTEGRATION

- Delivers a complete structural and machinery specification to reduce preparation time, ease bid preparation and comparison and unify financial reporting

- Integration with NS Maintenance Manager, NS Purchasing Manager, NS HSQE and Vetting Manager and NS Document Manager™ system modules delivers full life cycle management from planning to resolution

- ABS Wavesight NS Mobile* allows easy job tracking, completion reporting and overall drydock status

### COMPLIANCE

- Supports compliance with class surveys, ISM, TMSA, SubM, TSMS and RCP
